Immune Disorders 免疫失调？

New virus and antibiotic-resistance bacteria are increasing even advanced modern medicine exists. Human immune system functions are decreasing as well. This is most likely due to improper long term usage of antibiotics. Until now, flu, herpes and AIDS which caused by virus has no effective treatments. Research showed that Colostrum which is rich in immune factors by nature provides resistance to various pathogens. In his book "The best food for human being - Colostrum", Dr. Bernard Jensen pointed that the anti-viral functions of Colostrum is a precious discovery as platinum.

现代医学进步，但是新的病毒和耐抗生素细菌仍不断出现，人体免疫系统能力也逐步降低，出现这种现象的最主要原因是因为长期不适当的大量使用抗生素，其中感冒、流感、疱疹和艾滋病均是由病毒引起，至今尚无特效治疗方法。病毒作为对人类健康威胁最大的病原，而初乳是能够阻止它在体内繁殖的少数物质之一。研究证实：牛初乳是自然界唯一富含免疫因子的天然食物，牛初乳的抗病能力主要来源于其中免疫球蛋白，这是唯一能够抵御各种不同结构致病原侵害的物质。Bernard Jensen博士在1996年出版的《初乳：人类的最佳食物》一书中提出惊呼牛初乳抗病毒功能性是一个“白金般珍贵的发现”。

Colostrum is a milk secreted during the first 3 days after calving, the first mammary secretion. Previous studies showed colostrum has a critical role in post-neonatal health as an immune booster.

Bovine colostrum is nearly identical to human colostrum and can benefit growth and immunity, muscle mass development and bone and joint health in children and adults of all ages. Colostrum promotes both intestinal protection and the development of other neonatal tissues.
